KoKos Pet Spa to launch revolutionary pet spa products at upcoming Groom Expo 2009

Pennsylvania-based pet spa company to unveil innovative and eco-friendly new therapy/dry room and eco-friendly pet vitamin shower to US market, September 17-20, 2009 at Groom Expo 2009.

BROOMALL, PA – September 14, 2009 – KoKos Pet Spa, the maker of innovative and eco-friendly pet spa products, announced today they will be unveiling two new pet skin health management products at the upcoming Groom Expo 2009, Booth #67, September 17-20 in Hershey, Pennsylvania, to the US market.

KoKos Pet Spa's new products, the Pet Vitamin Shower and the Infrared Sterilizing Therapy/Dry Room are revolutionary products designed to offer pets a pleasant, stress-free grooming experience, while providing healthier and safer features and functions for improved pet health management.

The company's newest product, the Pet Vitamin Shower, is a handheld shower head that attaches to a shower or bath nozzle creating a filtered, vitamin-C enriched shower for a healthier and more pleasant bathing experience for pets. The shower filters out 99.9% of the harmful chlorine and chloramine contained in tap water and revives and protects pet's skin, while keeping their fur shinier and healthier. The shower also includes optional massaging action providing additional therapeutic benefits for pets, as well as a water flow rate feature that saves 50% less water than traditional faucets and shower heads.

The Infrared Sterilizing Therapy/Dry Room is the ultimate pet drying experience for pets. The therapy/drying room has three levels of safety with time and temperature control, triple filter technology that optimizes pressure and fresh air circulation, and infrared light therapy. This innovative and revolutionary technology kills germs, fleas and mites preventing allergies, provides 100% complete drying with 30% less drying time, and prevents tangled hair and shedding all within a quiet, pleasant and stress-free environment.

-more-

“With the safety and effectiveness of KoKos Pet Spa products proven and utilized with over 5 million dogs in Brazil and Asia to date, we are extremely excited to bring our new Therapy/Drying Room and Pet Vitamin Shower pet spa products to the U.S. marketplace”, indicated Joseph Lee, CEO of KoKos Pet Spa. “Our goal is to provide groomers, veterinarians, pet spas and pet loving families across the globe with healthy, safe and eco-friendly pet grooming products to help their pets live a healthier, happier life”.

“My English bulldog, Memphis, suffered from genetic mites, says Brittany Motnik, a customer of Sassy Pet Spa. “The mites caused her skin to become irritated and her hair to fall out. After two failed attempts by the vet, I brought Memphis to the Sassy Pet Spa to try the vitamin shower and dryroom. In only two visits, I began to see a change. Her hair grew back completely and now eight months later, I am still a happy customer,” added Motnik.
